

Overview of Collision Checking Algorithms for Mobile Robots

Christian Pek

Technische Universität München

January 31, 2017

Motivation

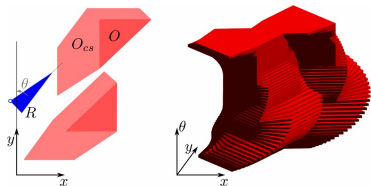

- How to detect a potential collision with an obstacle?

Figure: First crash of a self-driving vehicle

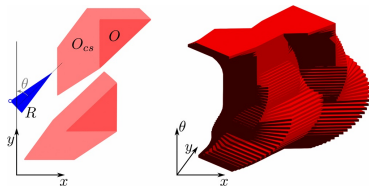

Topic

- Example: collision check within the configuration space

Topic

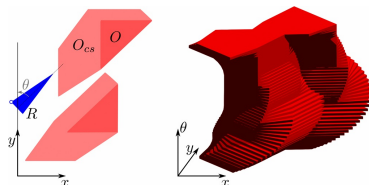

- Example: collision check within the configuration space

- Your task:
 - Literature research on collision checking algorithms for mobile robots
 - Comparison of the approaches
 - Limitations? Improvements? Usage?
 - Describe algorithm of your choice in detail

Topic

- Example: collision check within the configuration space

- Your task:
 - Literature research on collision checking algorithms for mobile robots
 - Comparison of the approaches
 - Limitations? Improvements? Usage?
